## STRUTTURA DEL PROGETTO DI SERVICE E COSTI STIMATI

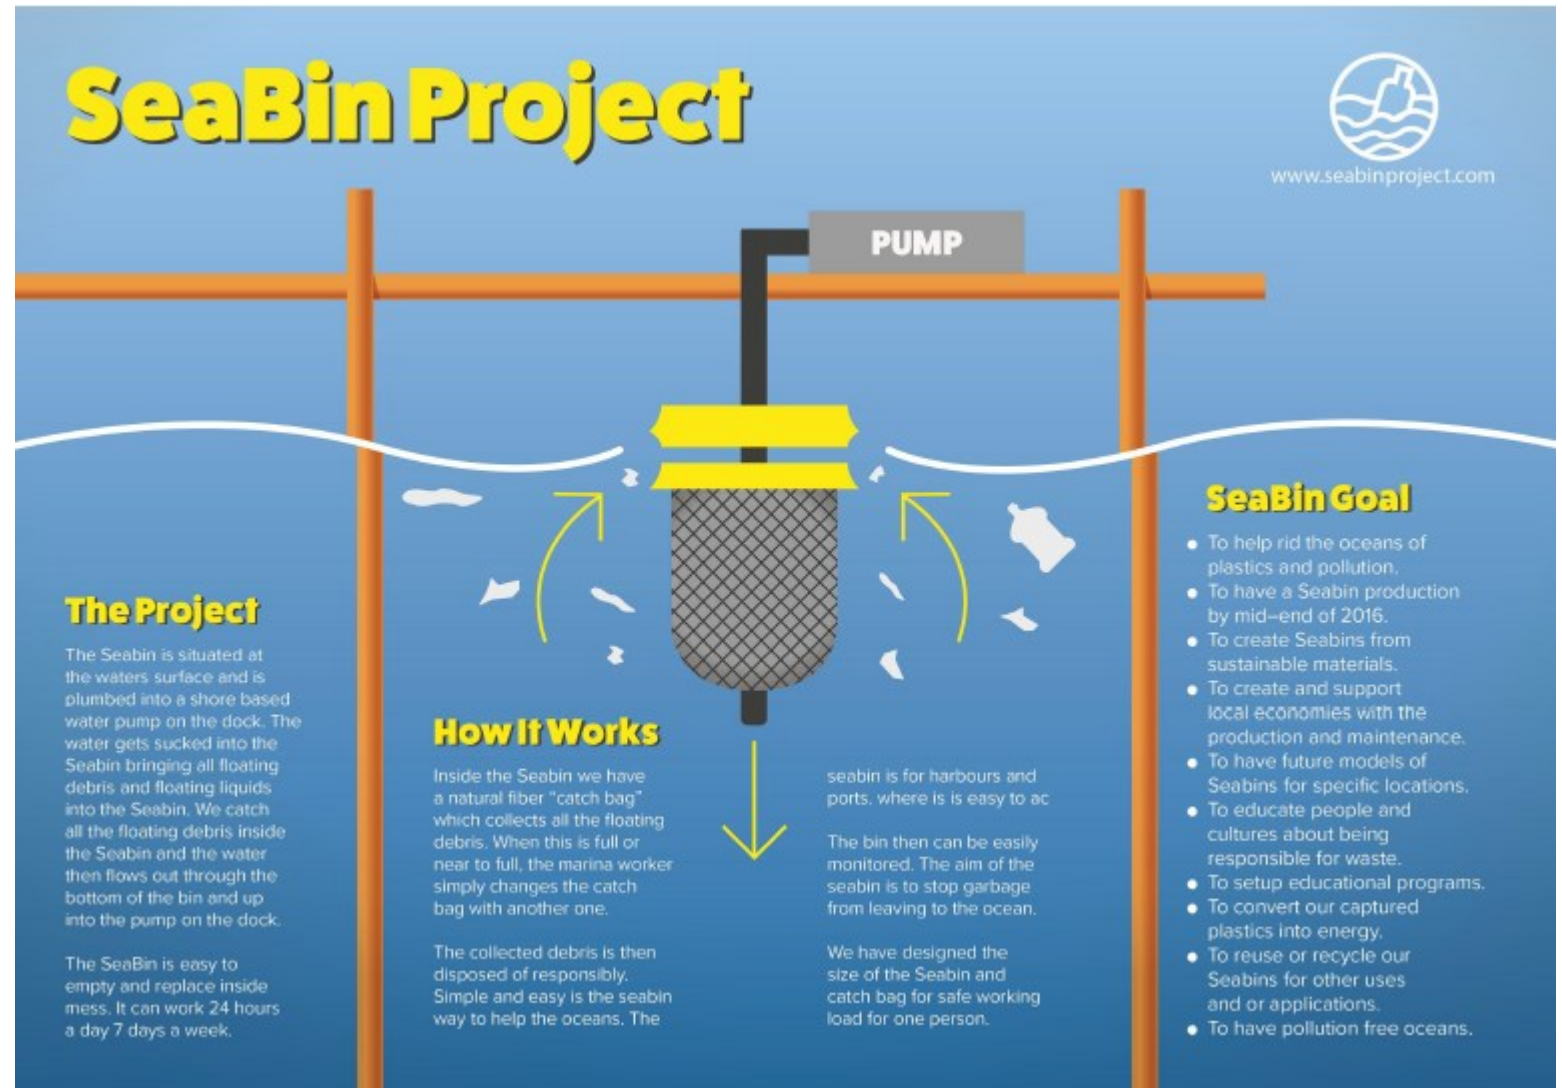

\* Prima stima di massima che tiene conto anche di eventuali imprevisti e comunque in attesa di conferma definitiva di maggiore dettaglio

# PROGETTO RISACCA

Il sistema è molto semplice. Seabin viene collocato in acqua ed è fissato ad un pontile galleggiante. È collegato a una pompa che crea un flusso d'acqua nel contenitore portando con sé tutti i rifiuti galleggianti e i detriti.

## SeaBin Project

The diagram illustrates the SeaBin project. A pump is mounted on a floating dock (represented by two vertical orange posts and a horizontal bar). A black pipe connects the pump to a yellow bin floating in the water. The bin has a mesh bottom and a yellow catch bag inside. Arrows indicate the flow of water and debris into the bin. The bin is connected to a pump on the dock. The diagram is set against a blue background representing the water.

[www.seabinproject.com](http://www.seabinproject.com)

### The Project

The Seabin is situated at the water's surface and is plumbed into a shore-based water pump on the dock. The water gets sucked into the Seabin bringing all floating debris and floating liquids into the Seabin. We catch all the floating debris inside the Seabin and the water then flows out through the bottom of the bin and up into the pump on the dock.

The SeaBin is easy to empty and replace inside mess. It can work 24 hours a day 7 days a week.

### How It Works

Inside the Seabin we have a natural fiber "catch bag" which collects all the floating debris. When this is full or near to full, the marina worker simply changes the catch bag with another one.

The collected debris is then disposed of responsibly. Simple and easy is the seabin way to help the oceans. The seabin is for harbours and ports, where it is easy to access. The bin then can be easily monitored. The aim of the seabin is to stop garbage from leaving to the ocean.

We have designed the size of the Seabin and catch bag for safe working load for one person.

### SeaBin Goal

- To help rid the oceans of plastics and pollution.
- To have a Seabin production by mid-end of 2016.
- To create Seabins from sustainable materials.
- To create and support local economies with the production and maintenance.
- To have future models of Seabins for specific locations.
- To educate people and cultures about being responsible for waste.
- To setup educational programs.
- To convert our captured plastics into energy.
- To reuse or recycle our Seabins for other uses and or applications.
- To have pollution free oceans.

# CHAI RITY

Raccogliere i capelli in una **ciocca** o in una **treccia** e legarli ben stretti con un elastico o con una fascettina.

È necessario che la **lunghezza** dei capelli **non** sia **inferiore** a **25cm**.

I capelli in piccole code andranno tagliati appena sopra l'elastico.

Chiudere i capelli le code e le trecce tagliate in **busta**.

**Spedire** o **consegnare** di persona all'associazione scelta.
